N7D520 Building Applications for the Web using IBM Lotus Domino Designer 7

Length: 2 Days

Course Description: This course extends participants' Domino application development skills by teaching them how to use the Domino tools to design and develop dynamic Web applications. Participants learn how to efficiently use Domino fields and page layout design elements in the Web pages. They learn how to use JavaScript in their Domino application. Participants do not need to know how to program in this language to acquire an understanding of how and where to apply the programming capabilities to the best advantage. Finally, this course covers security topics specific to the Domino web environment.

Prerequisites: The prerequisites for this course include skills in developing Domino 6/6.5 or Domino 7 applications. These skills are taught in:

ND510 - Developing IBM Lotus Domino 6 Applications: Foundation Skills

N7D510 - IBM Lotus Domino Designer 7 Fundamental skills in developing Domino 6/6.5 or Domino 7 applications. These skills are taught in:

ND510 - Developing IBM Lotus Domino 6 Applications: Foundation Skills

N7D510 - IBM Lotus Domino Designer 7 Fundamentals.

Audience: The target audience for this course is IBM Lotus Domino application developers who need to build Web-enabled Lotus Domino applications using Domino Designer 7. IBM Lotus Domino application developers who need to build Web-enabled Lotus Domino applications using Domino Designer 7.

Topics Covered:

This course covers the following topics:

- Building Domino Forms for the Web
- Enhancing the appearance of Web Pages
- Using JavaScript in forms
- Customizing Web Site Functionality
- Securing a Domino Web application
- Building Domino Forms for the Web
- Enhancing the appearance of Web Pages
- Using JavaScript in forms
