

Lotus Notes

N7D780 Configuring IBM Lotus Domino 7 Web Servers

Length: 1 day

Audience

The target audience for this course is experienced IBM® Lotus® Domino® system administrators who have already deployed a basic Lotus Domino infrastructure including servers, clients, mail routing, and replication and who are responsible for configuring some of the existing Lotus Domino servers as Web servers.

Description

This course that covers configuring an existing IBM® Lotus® Domino® server to be a Web server including:

- Modifying configuration parameters
- Enabling Web security
- Configuring IBM® Lotus® Notes® and Non-Notes clients to access the Web server

The course does not cover installing and configuring a basic Lotus Domino infrastructure, or setting up mail routing and replication

Prerequisites

The prerequisites for this course include completion of the following Lotus Domino courses or equivalent knowledge, skills, and experience:

- IBM Lotus Domino 7 Operating Fundamentals
- Building an IBM Lotus Domino 7 Infrastructure
- Managing IBM Lotus Domino 7 Servers and Users (recommended)

Objectives

You will configure Web servers in an IBM® Lotus® Domino® 7 environment.

Topics Covered

Lesson 1: Configuring the IBM® Lotus® Domino® Web Server

Topic 1A: Starting the IBM® Lotus® Domino® Web Server

Topic 1B: Specifying IBM® Lotus® Domino® Web Server Settings

Topic 1C: Controlling Access to the Web Server

Topic 1D: Enabling Single Sign-On

Topic 1E: Controlling Access to Web Server Files

Lesson 2: Securing an IBM® Lotus® Domino® Web Server

Topic 2A: Using a Certifying Authority

Topic 2B: Setting Up SSL on a Server

Lesson 3: Setting Up SSL and S/MIME for Clients

Topic 3A: Setting Up Web Browsers for Server Authentication

Topic 3B: Setting Up IBM® Lotus Notes® Clients for Server Authentication

Topic 3C: Setting Up SSL Client Authentication and S/MIME

Topic 3D: Setting Up the Server for Client Authentication

Topic 3E: Setting Up Internet Clients for Client Authentication

Topic 3F: Setting Up an IBM® Lotus Notes® Client for SSL Client Authentication and S/MIME

Appendix A: Worldwide Corporation Infrastructure Plan

Supplemental Lesson Worldwide Corporation Infrastructure Plan

Appendix B: Course Scenario

Appendix C: Certification and Exam Competencies

Appendix D: Instructor Preparation
